## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments filed on have been fully considered but they are not persuasive.

The 112 rejection of claims 40-60 has been maintained. The terms "model" and "system" recite in the claims are still confusing. New rejection to claim 54 has been made.

The rejection to the drawings has been maintained. Replacements drawings must be filed in response to the office action.

Applicant's argument or explanation with regard to the claims leads to more confusion. For instance, Applicant argues that the term "**model**" is used throughout specification in the mathematical sense. Using the same term in the claim renders the claim overly broad, indefinite, and vague. For instance, claim 40 recites in paragraph (d): "identifying a model" It is read as if the mathematical expression is identified after being used to establish a relationship between the analog input and the discrete correction signal. Applicant also argues that the "**system**" refers to "hardware", "software"... In the application the term "system" refers to the cascade. However, in the claims, the term "system" can have different interpretations and seems to be confusing in many instances. For instance, claim 52 recites in the preamble "a multi-stage system; It is not clear is "system as recited in the claim represents "hardware" or software" or "cascade". Paragraph (f) of the same claim recites "multistage system model" this is confusing.

### *Claim Objections*

2. Claims 44-45 are objected to because of the following informalities: Claim 44 depends on canceled claim 1. Change the dependency of claim 44 appropriately in order to clarify the claimed language. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 54 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claim 52 the term "mechanism which causes decaying of said integrated signal" is not described in the specification.

5. Claim 54 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 54 the term "mechanism which causes decaying of said integrated signal" has not support in the specification.

In addition, claim 44 depends on canceled claim

***Allowable Subject Matter***

6. Claims 40-60 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
